THE SAFETY SHOE

# PROTECTION IN SPORTY STYLE

At the workplace, nothing is more important than safety. That is why safety is the most crucial factor in the development process of our shoes. But today's professionals demand for more than shoes that are simply safe. They want shoes that provide maximum comfort and stability, look stylish and, at the same time, give their feet the best support all day long. Designed to satisfy the most demanding professionals, our SportMates® collection will truly exceed your highest expectations on all fronts.

## PERFECT SOLUTION FOR ON THE GO

The SportMates® collection sets a new standard in safety, breathability, lightness and design. With its sporty style and light weight, SportMates® are the perfect solution for professionals on the go. A soft cushioned EVA midsole provides outstanding comfort and high level impact absorption. This, in combination with a latex foam inlay sole, breathable mesh and lightweight uppers, creates an optimal climate inside the shoe for day-long comfort.

## NON-STITCHING

All features are geared towards maximum safety and maximum comfort. A non-stitched upper is less vulnerable, minimising the possibility of tears. And despite being light, flexible and comfortable all day long, SportMates® still provide the best possible protection with composite toecaps and durable rubber outsoles with SRC slip resistance.

Safe, light, comfortable, breathable and a sporty look: the SportMates® collection delivers uncompromising quality and performance.

### WRIGHT S1

- > Microfiber upper/mesh
- > PU non-stitching
- > Composite toe cap
- > Breathable mesh lining
- > EVA/rubber outsole
- > Latex foam footbed
- > Width W
- > Uk size range: 2-13 (EUR 35-48)
